## What Data Titans Offers:

- Managed Service Provider (MSP)
- Desktop, server, and network management and monitoring
- Network Security
- Security Software Installation and Management
- Hardware Upgrades and Repairs
- Data Backup Solutions and Disaster Recovery
- 24/7 Helpdesk Support

## Providing Big IT Services for Small & Mid-Size Businesses

What Data Titans brings to your business is professional services that match, if not exceed, your business needs. Coming from a small business we understand the challenges and the needs small to medium sized businesses face daily; your company's network should not be one of them. We make sure that all the components in your company's network work together at their best so that you can too. Data Titans is known for our technical expertise, our flexible "grow as you go" solutions, and excellent customer service.

We take time to examine and diagnose your preexisting network and configurations, give you real-world solutions, and guide you through the process side-by-side. Whether it's implementing new services, servers, setting up your mobile devices on your network, upgrading your workstations, or backing up your data to the cloud, we'll provide the guidance needed to do so.
